Art Unit: 3751

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "assembling" step set forth in claims 10 and 18 and "interengaging" steps set forth in claims 10-18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Proper antecedent basis for the "securing means" set forth in claims 9 and 18 could not be found in the specification. Applicant is reminded claim terminology in mechanical cases should appear in the descriptive portion of the specification by reference to the drawing(s).

3. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 recites a system "for enabling the assembly of a front panel... to each of a pair of side panels" where securing elements are "complementary" and "interengagable".

Implementation of this subject matter is neither taught in the instant disclosure nor evident to the examiner. Claims 9, 10 and 18 recite similar subject matter.

4. Claims 10 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3751

Claim 10 is unclear as to whether the "sauna cabin" is intended to be part of the claimed combination since structure of the "system" is defined as being connected thereto (lns. 11-14), but no positive structural antecedent basis therefor has been defined. Claim 18 is similarly indefinite.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-18, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Wheat.

The Wheat reference discloses an assembly comprising: a plurality of securing elements/securing means 13 including side securable portions 15 and a medial interengaging portion 16; and panels 10,10a, as claimed. The initial statement of intended use (sauna cabin), and all other functional implications related thereto (front, side), have been considered but do not appear to impose any patentably distinguishing structure over that disclosed by Wheat.

7. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.
